KORFIL INC.

Mr. Fred Haas
Technical Representative
Korfil Incorporated
P.O. Box 123
Chicopee, Massachusetts 01014

Dear Mr. Haas:

This is in further response to your request to consider Korfil Block insulation for use in our construction.

As indicated to you in our letter of September 11, 1985, we asked our Huntsville, Alabama Division office to evaluate your product. Based on their evaluation, concrete masonry block insulation fabricated from polystyrene board stock conforming to Federal Specification HH-I-524 will be included in the Corps of Engineers Guide Specification CEGS 04200, Masonry, as an option to loose fill insulation. CEGS 04200 is currently under revision and is expected to be published this year.

Again, thank you for your interest in providing products for use in military construction.

Sincerely,

William N. McCormick, Jr.
Chief, Engineering Division
Directorate of Engineering and
Construction
