

Protection is a concrete idea.

The accompanying pictures were taken in December, 2005. The building was constructed in approximately 1974, making the building 31 years old. The demolition of the building, located at 39 Commerce Drive in Henrietta, NY, was known as the Stuart Oliver Holtz site. Demolition was performed to make way for an addition to another building.

The intent of these pictures is to verify the longevity that can be expected from the CBIS/Korfil product lines of CMU insulation under actual field conditions.
