 ORDER NO.: _____
 DATE: _____

To insure delivery of the proper size inserts to fit your particular cores, we would appreciate your filling out this form. In addition, we ask that measurements be taken for each block core in multiple cavity block molds due to some molds having different cavity or core dimensions. We thank you in advance for your considerations.

NOTE: All dimensions are to be taken from the top (widest area of the cores) of the block as they are removed from the block molds during manufacturing.
